

Owner: City of Burnaby
Location: Gaglardi Way and Eastlake Drive, Burnaby, British Columbia
Coordinates: 49°15'27"N, 122°54'43"W
Market: Seismic Upgrading
Start / Completion Dates: March 2007 – August 2007
Contract Value: CDN \$1,091,000

**Project Description:**

As part of a civil infrastructure upgrading initiative, the Lake City Overhead received much-needed repairs, maintenance, and seismic safety retrofits. This included:

- Widening of the existing bridge deck and the addition of parapet barriers
- Supply and installation of deck joints
- Supply and installation of new pedestrian fencing
- Bearing-seat repairs
- Concrete repairs to pier caps, columns, and slope-paving
- Column encasement and strengthening

Corporate Role:

As General Contractor, Coquitlam Ridge Constructors undertook all demolition, surface preparation, concrete works and installation of miscellaneous metals.

In addition, CRC prepared and implemented a comprehensive traffic management plan for completion of the project in two phases.
